

## **Attention All Printers**

Based on the overwhelming positive response to submitting un-mounted prints in club competitions, we are going to try it for the next few print competitions and, based on the level of success we achieve, will consider making it permanent.

Beginning with the next print competition on January 26<sup>th</sup> and continuing until further notice, we will accept **BOTH mounted and un-mounted prints**.

While I am confident that neither the “print holding” device nor the careful handling of an un-mounted print will cause any damage to your print(s), accidents can happen. In an effort to avoid any mishandling, a new “print passing” procedure will be put into place, including the use of rubber gloves to reduce the chance of a print slipping out of a grip during handling.

For those of you who are interested in learning how to prepare an un-mounted print with the appearance of a mounted print, a simple tutorial is attached.
