

Steps To Make a Print

1. Open your Image in Photoshop.
2. Crop the Image.
3. Make the Image the size you need for what you wish to do.
For a 13" x 19" or 8" x 10".
4. Tweak the Image.
 - A Go to Image>Adjust>Auto Level
 - B Lasso the area that is to light-set the feather to about 30.
 - C Go to Image>Adjust>Levels and darken the area.
 - D Now go to the Lasso and draw a area around the center of entrust. Go to Select>Inverse.
 - E Go to Image>Adjust>Level and darken the area very little.
5. You can now sharpen your Image, go to Filter>Sharpen>Unsharp Mask. Make the amount-100, Radius 1.0, Threshold- 0, click OK.
6. To add a Black line round the Image, go to Select>all, go to Edit>Stroke, Make the color black, click OK, Go to Select>Deselect.
7. Now you are ready to print. Go to your print program and print. You have your color print.
8. Now lets make a B&W Print.
9. Leave your print in Photoshop, We will take it from here.
10. Go to Image>Adjust>Channel mixer, check the Monochrome box. Set the red channel to 33.3, same for the Green and the Blue. You now have a B&W that is equal.

From here you can adjust the Image to suit yourself.

11. You have the black line around the Image from the color Image you made earlier, so you are ready to print.

12 I print B&W with black ink only, do as you wish.
